STILL IN FLUX

변하고, 흐르고, 다시 형성되는 지금의 세계

우리가 서 있는 지금의 세계는 어떤 기준도 단단히 고정되어 있지 않은 과도기의 시간입니다. 정치적 중심은 이동하고, 산업의 구조는 재편되고, 기술은 인간의 역할을 다시 묻고 있습니다. 확실한 답보다 조율과 균형, 하나의 기준보다 다층적 감수성, 예측 가능한 패턴보다 열려 있는 해석이 중요한 시대. 이 변화의 시기는 혼란이라기보다, 새로운 감각과 의미가 서서히 모습을 드러내는 형성의 과정입니다. 디자인 또한 이러한 흐름 속에서 지금의 삶을 더 정확히 읽고 포착해야 하는 시점에 놓여 있습니다.

STILL IN FLUX는 고정되지 않은 세계를 두려움이 아닌 가능성으로 바라보는 태도, 변화를 받아들이며 새로운 질서를 조심스럽게 구성하는 감각, 그리고 그 속에서 다시 '지금의 미학'을 형성해가는 과정을 상징합니다.

The world we stand in today is a transitional time, where no single standard is firmly fixed. Political centers are shifting, industrial structures are being reorganized, and technology is questioning the role of humans once again. In this era, coordination and balance matter more than definitive answers, layered sensibilities more than a single standard, and open interpretations more than predictable patterns. This period of change is not chaos, but a formative process in which new senses and meanings gradually emerge. Design, too, is at a point where it must read and capture life as it exists now within these currents.

STILL IN FLUX symbolizes an attitude that sees an unfixed world not with fear but with possibility, a sensibility that cautiously constructs new orders while embracing change, and a process through which the aesthetics of the present are re-formed.

Theme 1.

CHORD 조율의 미학

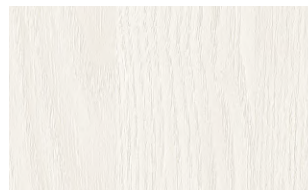

변화의 흐름을 읽고, 조율하는 감각

오늘의 세계는 더 이상 하나의 기준이나 단일한 중심으로 설명되지 않습니다. 정치·산업·문화 전반에서 영향력이 분산되고, 서로 다른 가치와 감각이 동시에 존재하는 시대가 되었습니다. 이러한 변화 속에서 중요한 것은 '고정된 틀을 유지하는 것'이 아니라 변화의 흐름을 민감하게 읽고, 서로 다른 요소를 부드럽게 조율하는 능력입니다. 테마의 디자인은 이러한 시대적 감각을 반영해, 서로 다른 스타일·재료·문화적 결이 자연스럽게 공존하는 컨템포러리 조화를 제안합니다. 절제된 현대성 위에 다양한 감성이 유연하게 더해지며, 단정하지만 한 방향에 고정되지 않는 지금의 미학을 공간으로 구현합니다.

Sensing and Harmonizing the Currents of Change

Today's world is no longer defined by a single standard or center. Influence is dispersed across politics, industry, and culture, allowing diverse values and sensibilities to coexist. In this environment, what matters is not clinging to fixed frameworks but sensing shifting currents and smoothly harmonizing different elements. Theme 1 reflects this mindset, presenting a contemporary harmony where varied styles, materials, and cultural textures naturally coexist. Built on restrained modernity, the design balances multiple sensibilities, creating a composed yet flexible aesthetic suited to our times.

Theme 2.

SENSORIAL 감각의 온도

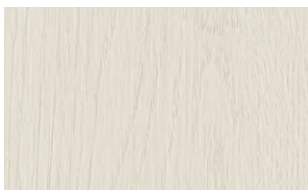

감각적 결핍을 채우는, 온도의 디자인

기술·경제·환경의 변화가 만든 결핍 속에서, 사람들은 다시 '감각'에 몰입하기 시작했습니다. 여러 감각을 동시에 자극하는 멀티센서리 경험, 차가움과 따뜻함이 공존하는 대비의 미학, 그리고 정서적 안정을 위한 컬러와 질감의 중요성이 더욱 부각되고 있습니다. 이러한 흐름 속에서 테마2의 디자인은 감각을 과하게 자극하지 않으면서도, 온도·질감·빛의 대비를 통해 깊이 있는 감각의 균형을 만드는 데 초점을 둡니다. 메탈의 차가움과 우드의 따뜻함이 함께 놓이고, 절제된 미니멀리즘 속에서 포근한 중간톤이 머무르도록 설계한 '따뜻한 미니멀리즘'이 핵심 방향입니다.

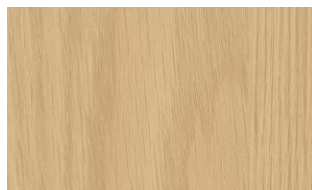

Designing Temperature to Fill Sensory Gaps

As shifts in technology, the economy, and the environment create a sense of sensory depletion, people are turning back to richer sensory experiences. The contrast of warmth and coolness, multi-sensory engagement, and the emotional role of color and texture are becoming increasingly important. Theme 2 focuses on balanced sensory depth without overstimulation, using contrasts in temperature, texture, and light. Cool metal pairs with warm wood, and soft mid-tones settle within a restrained minimalism—expressing a direction of warm minimalism, where comfort and clarity coexist.

Theme 3.

MEANING 의미의 결

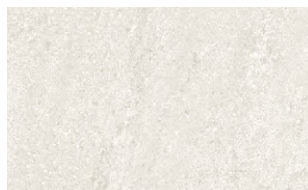

정보를 넘어, 의미를 설계하는 시대

AI가 일상으로 깊숙이 들어온 지금, 중요한 것은 '얼마나 많이 만드는가'가 아니라 '어떤 의미를 담아 전달하는가'가 되었습니다. 정보가 넘쳐나는 시대일수록, 맥락을 읽고, 해석을 더하고, 본질을 남기는 감각이 더욱 중요해지는데요, 이것이 AI 시대에도 인간이 가진 고유한 역할이자 가치입니다. 테마3의 디자인은 과잉된 시각적 정보에서 벗어나, 여백·질감·재료의 본연을 강조하는 방식으로 '의미가 머무르는 공간'을 제안합니다. 과거의 결을 보존한 재해석, 자연스러운 재료의 깊이, 조용하지만 오래 남는 미묘한 분위기 등 사유를 만들어주는 컨텍스트 중심의 디자인을 추구합니다.

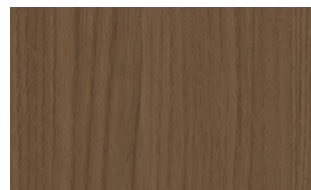

Beyond Information, Designing Meaning

As AI becomes part of everyday life, the focus shifts from how much we create to what meaning we deliver. In this age of information overload, the ability to understand context and preserve core essence remains a distinctly human strength. Theme 3 offers spaces where meaning quietly lingers by embracing simplicity, texture, and the natural qualities of materials. It values reinterpretation that honors history, subtle atmospheres, and thoughtful, context-rich design.

PET & PVC COMPATIBILITY

KCC글라스 '비센티' 는 소재별 디자인 호환이 가능하며, 공간의 용도나 시공 부위에 따라 다양한 소재를 자유롭게 선택할 수 있습니다. 벽면, 도어, 가구 등 다양한 부위에 동일한 디자인의 마감재를 적용해 공간 전체 인테리어 톤의 일관성을 유지할 수 있으며, 완성도 높은 인테리어를 구현할 수 있습니다.

KCC GLASS "VICENTI" offers design compatibility across different materials, allowing you to freely choose various materials depending on the purpose of the space or the area of installation. By applying the same design to different finishes such as walls, doors, and furniture, you can maintain a consistent interior tone throughout the space and achieve a highly refined interior design.

R-PET

R-PET 소개

R-PET(Recycle PET)

'KCC글라스 리사이클 가구용 필름'은 재활용 플라스틱 (PCR, Post Consumer Recycled) 원료를 사용하여 만든 친환경 제품입니다. 폐 PET병을 수거한 후 고도의 리사이클 기술과 불순물 제거 공정을 통해 기존 원료와 동등 수준의 물성을 확보한, 최고 수준의 리사이클 원료가 함유되어 있습니다.

'KCC GLASS R-PET is an eco-friendly film made by PCR(Post-consumer recycled) materials. It contains the world's highest level of recycled raw materials that have secured the same level of physical properties as existing raw materials from used PET bottles collected through advanced recycling technology and impurity removal process.

최종 소비자들이 사용하고 버린 폐 PET에 의해 **환경 문제 발생**

Environmental problems caused by waste PET used and discarded by PCR(Post Consumer Recycle)

KCC글라스만의 고도의 리사이클 기술을 통해 폐 PET병을 재활용한 **리사이클 가구용 필름 생산**

Using KCC GLASS' advanced recycling technology, film production for recycled households recycling waste PET bottles

폐기물을 줄이고, 재활용을 통한 **자연 순환의 가치 실현**

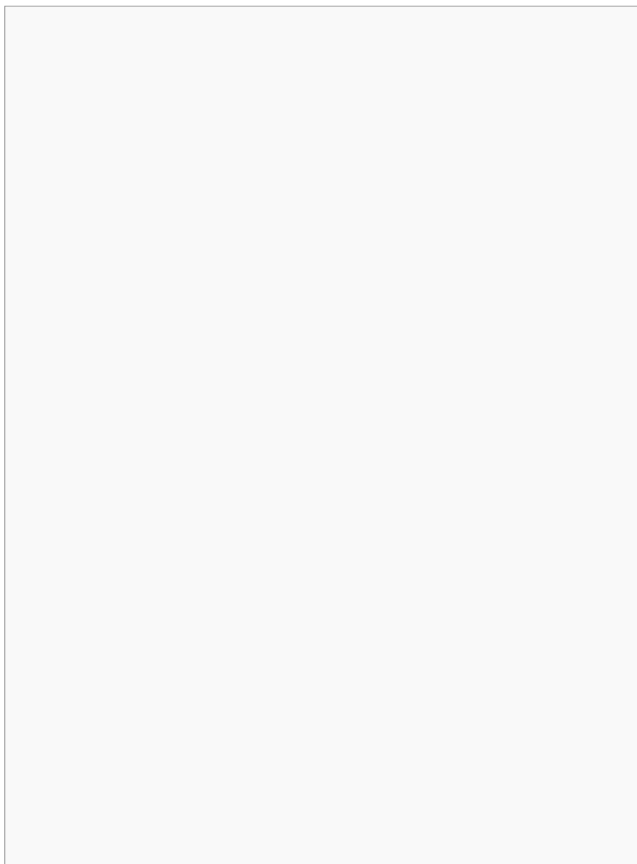

Reducing waste and realizing the value of natural circulation through recycling

P-FR 소개

P-FR(PET Flame Retardant)

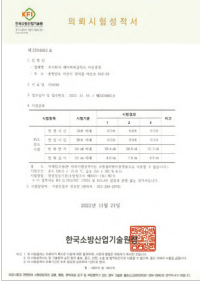

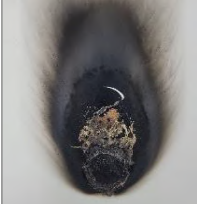

P-FR(PET Flame Retardant)는 KCC GLASS만의 방염기술이 집약된 제품으로 PET FILM 자체 방염성능 뿐만 아니라 MDF 부착 후에도 방염성능이 구현되는 제품입니다.

KCC GLASS flameproof PET is a product that combines KCC GLASS's flameproof technology, and not only PET FILM's flameproof performance, but It is also a product that realizes flame resistance performance even after attaching MDF.

ESM

ESM 소개

ESM(EGIS Super Matt)

ESM(EGIS Super Matt)은 유럽의 최신 Lacquer 경화 기술과 KCC GLASS만의 도료 제조/개발 기술을 융합하여 만든 프리미엄 제품입니다.

ESM (EGIS Super Matt) is a premium product created by combining Europe's latest lacquer curing technology with KCC GLASS's unique paint manufacturing and development expertise.

주방 및 일반가구의 표면마감재로 건강친화형 주택건설기준에 부합하는 친환경 제품입니다.
고급스럽고 미려한 색상과 뛰어난 표면질감으로 품격 높은 공간을 연출할 수 있습니다.

It is an eco-friendly product that meets the standards for health-friendly housing construction as a surface finishing material for kitchens and general furniture. You can create a high-class space with luxurious and beautiful colors and excellent surface texture.

제품규격

Product Standard

소재 _ Material	두께 _ Thickness	폭 _ Width	용도 _ Usage
PET	0.2mm ~ 0.6mm	1,260mm ~ 1,440mm	가구전면용 (for furniture front)

제품특장점

Product Features

환경 친화형 소재 _ Eco-friendly material

- 한국공기청정협회 친환경 건축자재 인증 최우수 등급 (대상제품 : 솔리드)
- 유해 중금속(납, 수은 등) 미함유
- 프탈레이트 가소제 미함유
- PVC 미함유
- Best eco-friendly building material certification
- No harmful heavy metals (lead, mercury, etc.)
- No phthalate plasticizers
- No PVC

디자인 차별화 _ Differentiate your design

- 다양한 프리미엄 패턴과 색상으로 선택의 폭 확대
- 엠보싱에 의한 외관의 고급화
- 리얼 서스 질감의 메탈 효과 구현
- Expanded range of choices with a variety of premium patterns and colors
- Advanced appearance by embossing
- Implemented metal effect of the real-sus texture

유해물질 방출 최소화 _ Minimization of harmful substance emission

- 휘발성 유기화합물(TVOC) 방출 최소화
- 생활 환경오염 감소
- Minimize emission of volatile organic compounds (TVOC)
- Reduction of living environmental pollution

PUR 가공성 및 부착력 우수 _ Excellent PUR processability and adhesion

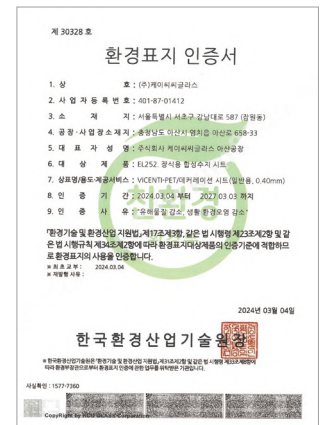

- 메탈제품의 내지문성 기능 부여
- PUR 가공성 및 부착력 우수
- Provide anti-fingerprint function of metal products
- Excellent PUR processability and adhesion
